

Questions 1-2 to CMHC RFP for Marine Engineering Services for Granville Island,

Vancouver, British Columbia, File # 201400490

Question 1

In reviewing the statement of work (Section 3.3), in conjunction with the expected valuation of services (Section 1.2), and our knowledge of the size and scope of Granville Island, we find it very difficult to provide an informed and reasonable estimate without knowledge of the contents of the "Seawalls and Docks Condition Study".

Answer 1

The services will be as requested and not to exceed the dollar values outlined in Section 1.2. The proponent should provide an hourly for their services.

Question 2

We would like to request a copy of said study in order to provide a high quality proposal to the CMHC. In keeping with Section 2.14, all information provided will be considered proprietary and treated confidentially.

Answer 2

The Seawalls and Docks Condition Study, in part or in full, will be provided to the successful proponent.
