Title: Lunar Rover Platform & Drivetrain Prototype (LRPDP)**An amendment is issued to :****Insert the following clarifications:**

Annex A, sections under CSA-EXCO-RD-0013 Requirements Document, the following elements are to be considered:

1. Section 4.2.2: The compliance with the performance requirements listed in section 4.2.3 LRPDP Performance Requirements must be performed taking into consideration the LRPDP and the payload instrument suite described in the RFP installed on the LRPDP, not the LRPDP alone.
2. Section 4.3.3: The compliance with the performance requirements listed in section 4.3.3 LRDP Performance Requirements must be performed in taking into consideration the complete LRPDP assembly and that it must carry the payload instruments suite described in the RFP.
3. Section 4.3.5 LRDP environment requirements: The temperature requirements to be used for modeling, verification and compliance are the operating temperature ranges specified in the requirement MANDATORY-ENV-01. The requirement MANDATORY-ENV-02 figure 4-13 is to specify margins only. Maximum and minimum temperatures used on Figure 4-13 are not to be used as the minimum and maximum ranges, the values specified in MANDATORY-ENV-01 are to be used. An environment profile compliant with these requirements and with the specified mission concept referred in the Annex A of the RFP is to be provided by the bidder.
4. Figure 4-11 and 4-2: These figures are to illustrate the concept of what is intended by the drivetrain. The motor placement as well as gearboxes, etc. are to be defined by the bidder, for instance choice of either in hub motor or chassis mounted motors options are left the bidder.

Annex A section under CSA-EXCO-SOW-0010 SOW, the following element is to be considered:

5. Section 3.5 Verifications: As per section 3.5 and sub-sections, verification of the LRDP must be accomplished using a bidder proposed load profile derived from the mission concept and requirements listed in the RFP and the appropriate Ground Support Equipment (GSE) provided to accomplish these tests and achieve compliance.
6. Section 4 Item 1: Given the requirements stipulated in the RFP, the proposed architecture and approach, the available rover battery pack listed in item 1 might not be suitable, per consequent item 1) Rover battery packs is removed from the list of identified GFE.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
