<b>Q #</b>	<b>Document Reference</b>	<b>Section Reference</b>	<b>Question / Comment</b>	<b>PSPC/RCMP Response</b>
1.	Advance Notice	Main	Our organization is currently going through RCMP certification based on the existing ICD 1.7.8 Revision 1.3. Should we certify to the new ICD 1.7.8 Revision 1.6?	<p>Vendors must be certified to the new ICD 1.7.8 Revision 1.6 in order to bid on the future planned Public Services and Procurement Canada (PSPC) competitive solicitation to establish a National Master Standing Offer (NMSO) for the provision of Electronic Fingerprint Capture Devices (ECFDs).</p> <p>The ICD 1.7.8 Revision 1.6 included in the posting is expected to be the final version that will be published in December 2018. The final version of the ICD 1.7.8 Revision 1.6 will be published by the Royal Canadian Mounted Police (RCMP) with its associated reference documents. These reference documents describe specific best practices that should be followed in order to properly implement ICD 1.7.8 Revision 1.6. Additionally, there will be an ICD supplemental document published with the final ICD which will explain that two of the new features will not be immediately available on RTID. Consequently, the Vendors must account for the new features being unavailable to ensure their systems are</p>

				<p>operational in the Production environment. The following is a draft explanation of what will be included in the ICD supplemental document concerning two new features.</p> <p>Vendors certifying to the new ICD 1.7.8 Revision 1.6 must either wait until the new Civil Screening Modernization (CSM) and Charge features are available in the RTID Production environment (planned for November 2019); or ensure their system is designed with configurable parameters to allow these features to be turned “ON” or “OFF”. That is, there would need to be a parameter that when set to “ON”, the EFCD operates in a manner that fully utilizes the CSM and Charge features. Otherwise, these features remain unavailable. During the certification process, RCMP will certify the EFCD with the CSM and Charge features “OFF”. Once everything is working as expected, the RCMP will certify the EFCD with the CSM and Charge features “ON”. This second part of the certification process will be a manual check of the NIST packets to ensure they are well-formed and valid until RTID has these features available. The ICD supplemental document will explicitly state the tags affected by these new features and how</p>

				<p>the configurable parameters must be used. CSM features include tags 2.865, 2.866 and 2.867. Charge features include tag 2.829 additional charge descriptions and field size changes.</p> <p>This approach will allow Vendors to become certified and at a later date change the configuration parameter(s) to support the new CSM and Charge features.</p>
2.	Advance Notice	Main	Who do we contact to get certified to the new ICD 1.7.8 Revision 1.6?	<p>Please contact <a href="mailto:BBS_Certification@rcmp-grc.gc.ca">BBS_Certification@rcmp-grc.gc.ca</a> to start the process of certifying to ICD 1.7.8 Revision 1.6.</p> <p>As noted in the Letter Of Interest (LOI), ICD 1.7.8 Revision 1.6 will be formally published with its reference documents in December 2018. Certification to ICD 1.7.8 Revision 1.6 will not start until January 2019, immediately following the publishing of the new ICD.</p>
