The purpose of Amendment 001 is to answer questions received.

1. **Questions and Answers**

The following questions were asked and the answers are included herein:

Question		Response
Q1	Ref. 2.1.1.4. [...] In the requirement, it is expected 10 Kg NEW per batch, but there is no requirement for the max NEW per items. Can it also be considered 10 Kg NEW in a single item?	There is no requirement for the Net Explosive Weight per single item. The mandatory requirement is for the equipment is to withstand the burn-off of minimum 10 kilograms Net Explosive Weight per batch (or per cycle) without incurring damage.
Q2	Ref. 2.1.1.5. [...] The 50 gr. of equivalent TNT per batch is a contradiction with the previous point. Otherwise 50 gr. is the max quantity per item?	The mandatory requirement is for the equipment to be able to withstand a detonation without incurring any damage, at minimum 50 grams TNT equivalent Net Explosive Weight per batch (or per cycle).
Q3	Ref. 2.1.1.6. [...] It means there may be people around the flash furnace while it is working?	As per the requirement 2.1.11.2, the equipment must require at most two operators. A safety distance must be recommended for the equipment operation, so that the equipment must be able to withstand a detonation without causing injury to operators, at minimum 500 grams TNT equivalent Net Explosive Weight per batch (or per cycle). In this case, the concern is for the safety of the operators, and not for the integrity of the equipment.

***** All Other Terms and Conditions Remain the Same *****
