

Aft Sea Chest Vent

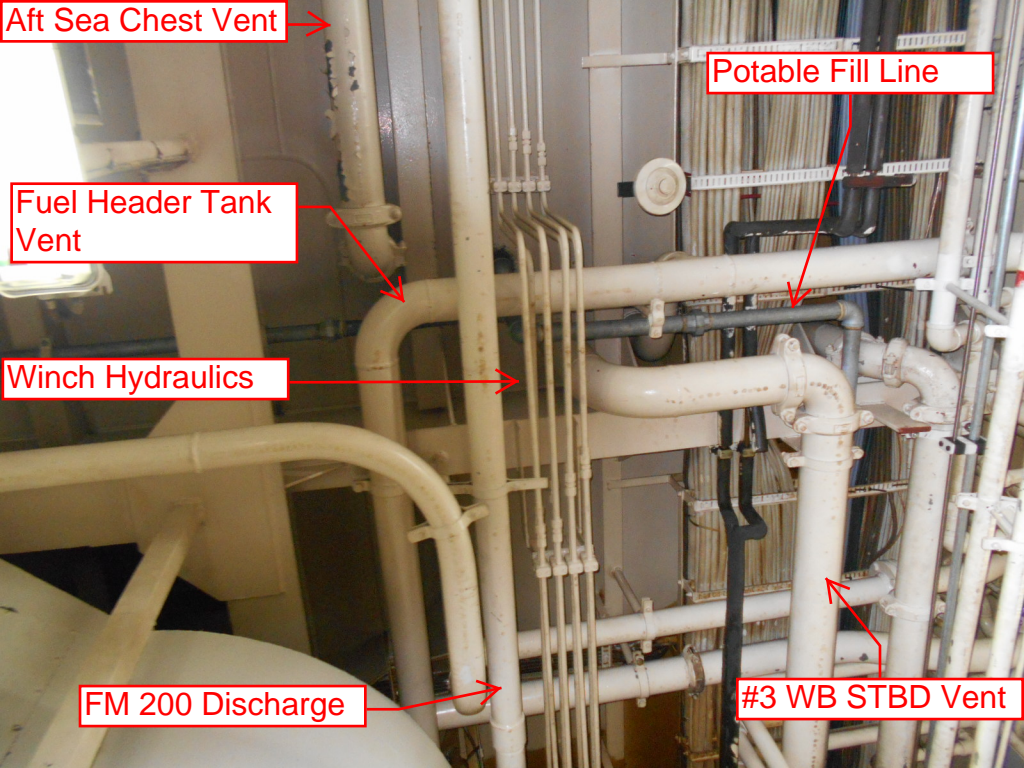

Potable Fill Line

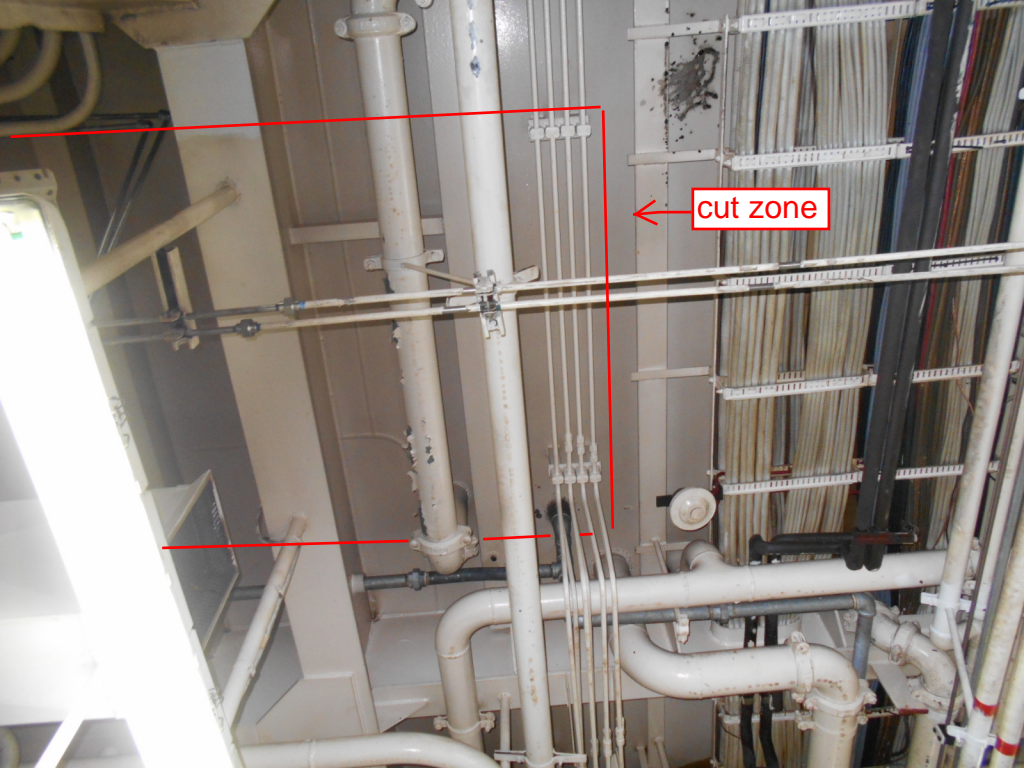

Fuel Header Tank Vent

Winch Hydraulics

FM 200 Discharge

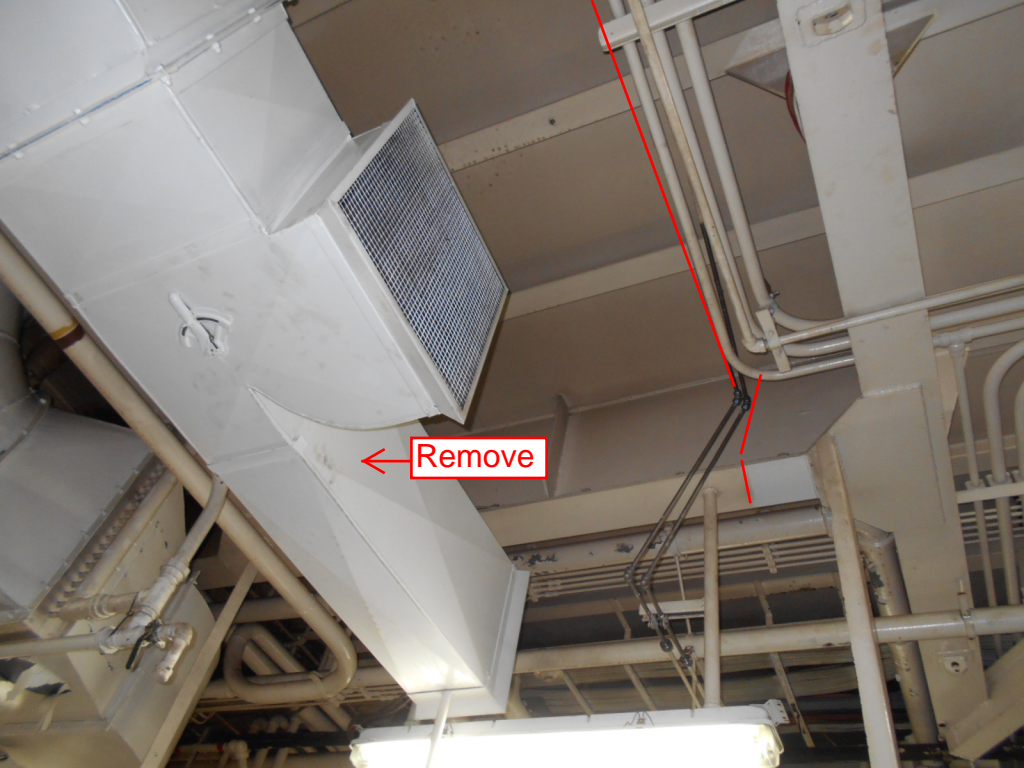

#3 WB STBD Vent

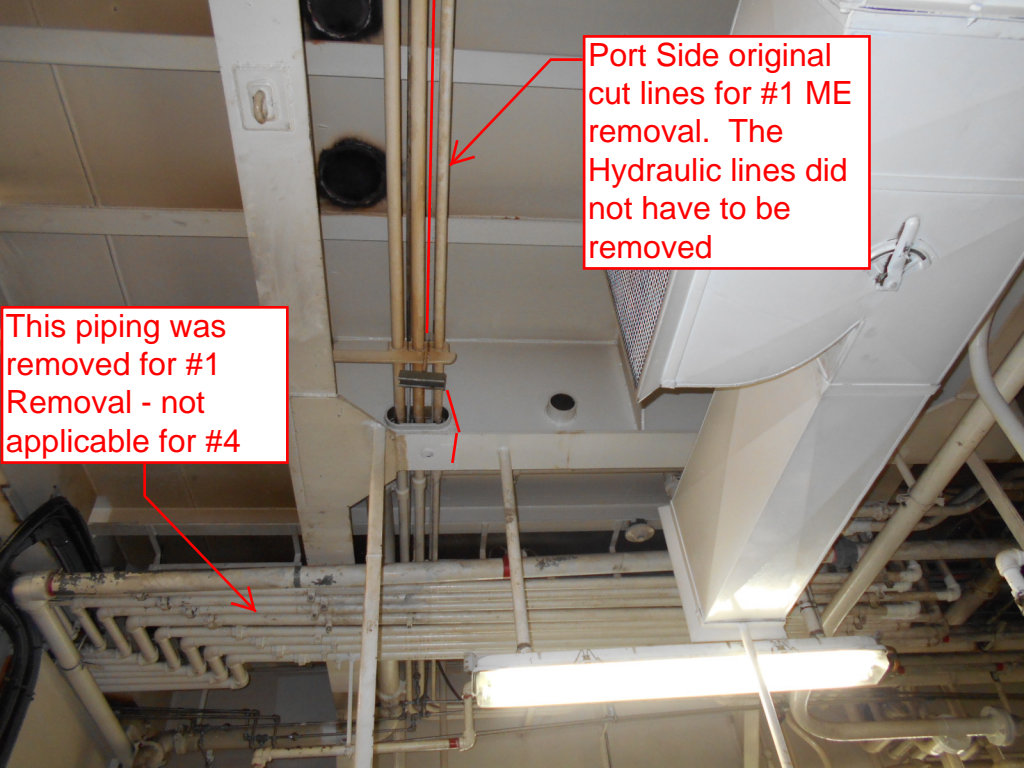

cut zone

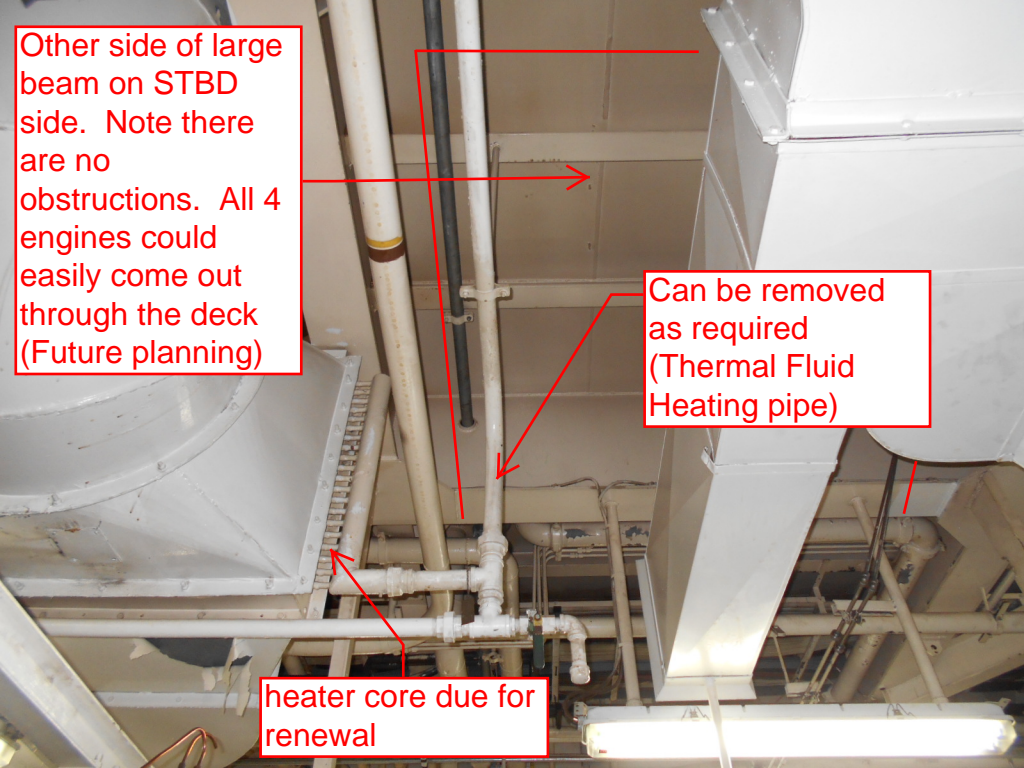

Remove

Port Side original
cut lines for #1 ME
removal. The
Hydraulic lines did
not have to be
removed

This piping was
removed for #1
Removal - not
applicable for #4

Other side of large beam on STBD side. Note there are no obstructions. All 4 engines could easily come out through the deck (Future planning)

Can be removed as required (Thermal Fluid Heating pipe)

heater core due for renewal

FM200 pipe is all welded, unlike the one above #1. Should be cut and threaded and union installed for future engine removals
