10.6 The plan must be reviewed at a minimum annually.

10.7 Cataloguing, selection and procurement of New Hazardous Materials. The Contractor must prepare, implement and administer procedures for the cataloguing of hazardous materials that are approved for use on the NWS. The hazardous materials catalogue must reside in electronic format on the Government provided NWS Information Management System (IMS), specifically MAXIMO, and must be available to the North Warning System Office (NWSO) Technical Authority (TA). The Hazardous Materials List-Catalogue to be in Contractor format accepted by Canada. Two reports/year (30 Sep / 30 Mar). List must at least include:

1. Item #
2. Description
3. Hazardous Waste
4. Halocarbon
5. WHMIS
6. CEPA
7. TDG

10.8 All hazardous materials must be catalogued as accountable items in MAXIMO with a unique identifier and must be tracked until they are issued for use. The Contractor must ensure that only those hazardous materials in the hazardous materials catalogue are procured. For instances where a particular hazardous material in the catalogue is no longer available, the Contractor must give preference to a substitute material that is not subject to control by the TDG regulations and or WHMIS. Where no such non-regulated replacement is not available, the new hazardous material must be catalogued as per the requirements of this SOW, prior to being procured.

10.9 Selection and procurement of hazardous materials is on-going. No instance where new hazardous materials were purchased and not added to the Hazardous Materials list, the estimate is ten hazmat procurements annually. The list must be updated within five business days after a new procurement.
