As this solicitation is issued by Fisheries and Oceans Canada (DFO), any reference to Public Works and Government Services Canada or PWGSC or its Minister contained in any term, condition or clause of this solicitation, including any individual SACC clauses incorporated by reference, will be interpreted as reference to DFO or its Minister.

All instructions, clauses and conditions identified in the bid solicitation by number, date and title are set out in the [Standard Acquisition Clauses and Conditions Manual](https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) (<https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual>) issued by Public Works and Government Services Canada.

There is approximately **9178** square meters of carpeted flooring throughout the Institute. The carpeting ranges from brand new installations to 20 years old, all of which are to be cleaned as part of this contract. We are requiring separate per unit pricing quotes for the majority of our upholstered furniture cleaning and per square foot pricing for our fabric workstations.

 All entrance mats are cleaned;

All cleaned carpets and fabric are to be left in a close to neutral pH;

Carpets are vacuumed by pile lifter (beater bar) vacuuming

Encapsulates are agitated onto all the cleaned carpet.

Extraction Process (also known as hot water extracting cleaning)

All stains are removed from the carpet using professional spotting chemicals;
 Cleaning solutions are pressure sprayed onto all carpeted surfaces using hydro-force technology;
 If required, high-traffic lanes are pre-scrubbed ;
 Cleaning solutions and soil are rinsed from the carpet using high-pressure portable and/or truck mount extractors;
 All cleaned carpets and fabric are to be left in a close to neutral pH;
 All entrance mats are cleaned;
 Encapsulates are agitated on to all the cleaned carpet.

There is to be no substitute for the encapsulation process

Encapsulation - Carpet

The required encapsulation process is a low moisture system that efficiently improves carpet appearance with limited down time for cleaning and drying. This low moisture technology is a unique polymer formulation that surrounds soil particles in the carpet and dries to a crystal that will not reattach or attract other soils.

The application process we require involves mechanical agitation whereby the encapsulate formula is introduced to the soiled carpets using gravity-fed injection through to a brush system that distributes, then

agitates, the encapsulates deep into the carpet fibers, releasing soils and effectively encapsulating them in preparation for vacuuming.

The Institute of Ocean Sciences, Sidney BC requires this process as an effective interim maintenance system that when combined with the on-going site pile-lift vacuuming and scheduled hot water extraction cleanings, provides a balanced approach to a quality maintenance program ensuring a healthy, green., safe and aesthetically pleasing environment for all its staff and visitors.

The Encapsulate product must be CRI and Eco Logo certified.

There is to be no substitute for the encapsulation process.
